EXPERIENCE

VR Software Developer   **Aug 2023-Present**
Utah Tech Online   St George, UT
- Building networked (multi-user) VR experiences, enabling remote students to interact within the same virtual space.
- Prioritizing user experience in VR development, ensuring the lab simulations are accessible and intuitive for students of varying technical backgrounds.
- Iteratively testing and refining VR lab experiences based on user feedback.

Lab Assistant   **Aug 2022-Aug 2023**
Utah Tech University   St George, UT
- Tutored computer science students in C++, algorithms, and data structures, improving their understanding and grades.

PROJECTS

Munchy (Personal Project)   **Jun 2023-Jul 2023**
- Developed Munchy, a full-stack social media app with JavaScript, Node.js (backend), and React (frontend) + Tailwind CSS for styling.
- Created RESTful API for recipe sharing, liking, bookmarking, and user interactions.
- Applied MVC pattern and Git/GitHub for well-organized code and version control.

Jarvis (Open-Source Contribution)   **Apr 2023-May 2023**
- Contributed to the Jarvis project on GitHub as one of 200 contributors, adding a GPT-2 feature to the command line interface personal assistant tool using Python.
- Successfully integrated GPT-2 functionality while adhering to project guidelines and following Python PEP8 coding standards.
- Created comprehensive test cases to ensure seamless integration and functionality with existing codebase.
- Gained valuable experience in open-source collaboration and further honed Python programming skills during the contribution process.

EDUCATION

Bachelor of Science in Software Engineering   **May 2024**
Utah Tech University   St George, UT
- GPA 3.91
- Achieved Presidents List five semesters (GPA >3.9)

SKILLS

- Python
- C++
- JavaScript
- React
- MongoDB
- MySQL
- Node.js
- Swift/Kotlin
